

YARIS

INTEGRATED HOUSING

PREFABRICATED BUILDING SOLUTIONS

Space, Ready for What's Next.

Modular housing systems for residential, hospitality, commercial and project applications.

BUILT AROUND YOUR PROJECT

Flexible by design. Clear from idea to use.

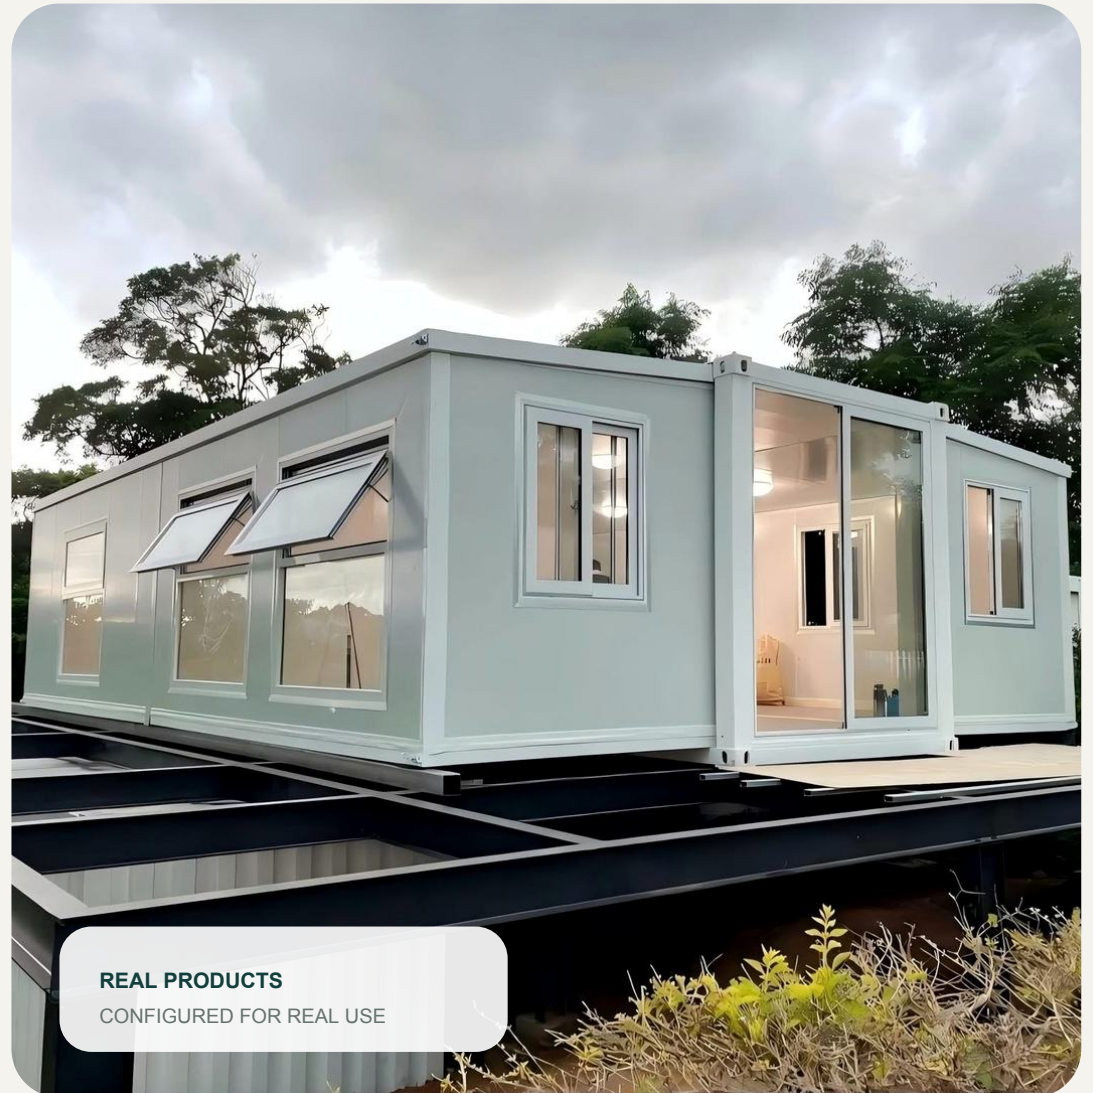

From compact service spaces to multi-room accommodation, YARIS brings modular structure, configurable finishes and project support into one coordinated solution.

PRODUCT FAMILIES

Folding units / Double-wing expandable houses / Quick-assembly houses / Two-storey modules / Apple cabins / Solar-ready options

REAL PRODUCTS

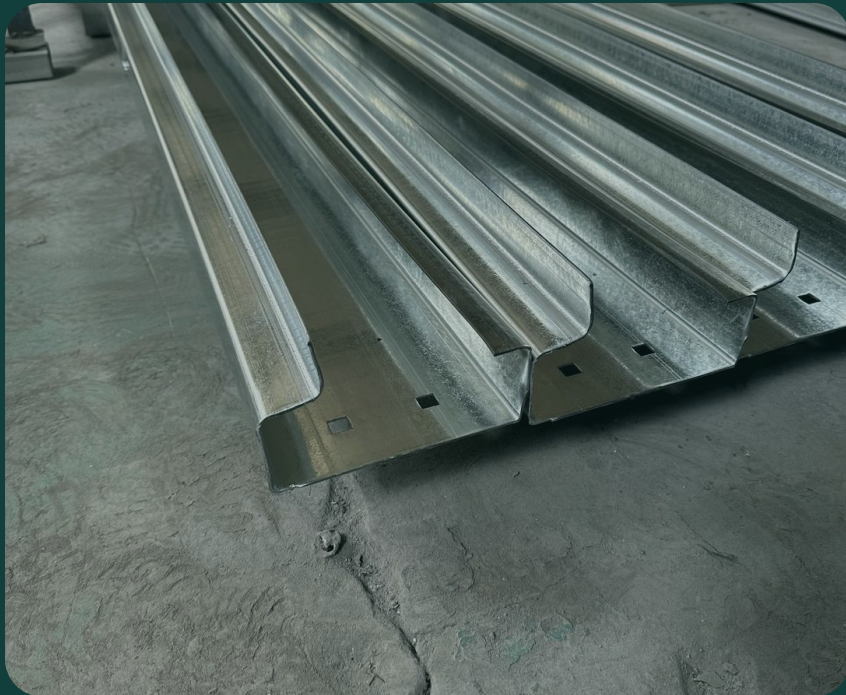

CONFIGURED FOR REAL USE

COMPANY

Manufacturing with a project mindset.

Wuhan Yarui Prefabricated Building Co., Ltd. integrates design, production, sales and service for modular and prefabricated building projects.

COMPANY SNAPSHOT

2011

Establishment date shown on the supplied business license.

Wuhan, China

Prefabricated buildings, modular container structures and related metal building systems.

PROJECT-BASED SUPPORT

Designed for speed, flexibility and repeat use.

A modular approach can simplify site work, shorten the path to occupancy and keep future changes in view.

01

Rapid deployment

Factory-prepared modules can reduce on-site work and streamline installation.

02

Flexible layouts

Room functions, openings, finishes and service packages can be configured to the brief.

03

Transport-aware

Product families are developed around practical shipping and handling considerations.

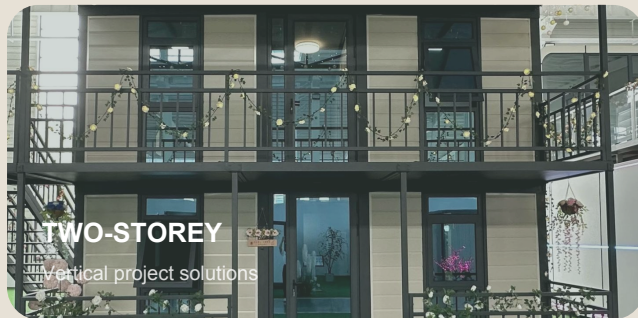

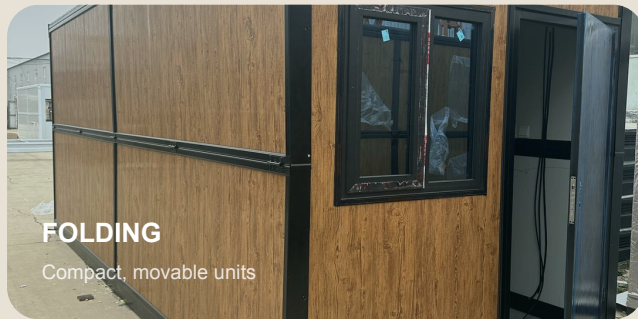

04

Reusable assets

Selected systems can be relocated, expanded or repurposed as project needs change.

One family. Multiple ways to build.

Choose a base system, then align the layout, facade, interior and services with the application.

FOLDING SERIES

Compact when needed. Useful when deployed.

Folding integrated units offer a practical starting point for guard rooms, kiosks, temporary offices and project support spaces.

MOVABLE

COMPACT

CONFIGURABLE

FOLDING SERIES

Straightforward spaces, ready for many roles.

Exterior finish, windows, doors and interior surfaces can be aligned with the intended use.

A frame-led system with room to adapt.

Quick-assembly modules combine structural components with configurable envelope panels for compact buildings and repeatable project layouts.

FRAME SYSTEM

MODULAR ENVELOPE

PROJECT CONFIGURATION

DOUBLE-WING EXPANDABLE

10 ft / Compact and focused.

A smaller-format expandable option for focused functions such as a private room, office, reception point or compact service space.

10 FT FAMILY

COMPACT FOOTPRINT

MULTI-USE

DOUBLE-WING EXPANDABLE

20 ft / Balanced for everyday use.

A versatile format for accommodation, site offices, meeting rooms and small residential layouts, with facade and interior options.

20 FT FAMILY

LIVING

OFFICE

HOSPITALITY

Compact outside. Carefully planned inside.

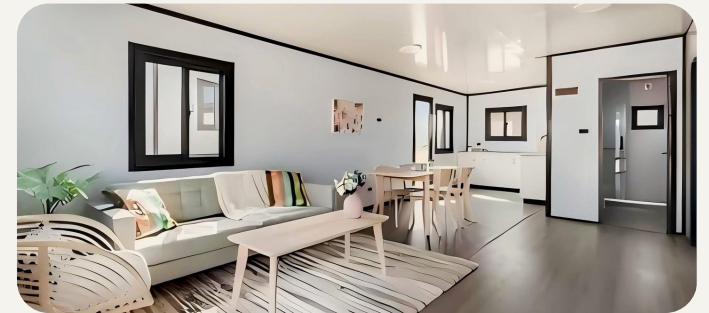

Bathroom, living and circulation zones can be coordinated around the final room program.

DOUBLE-WING EXPANDABLE

30 ft / More room to shape the plan.

A larger expandable family suited to multi-zone accommodation, family living, hospitality and commercial support uses.

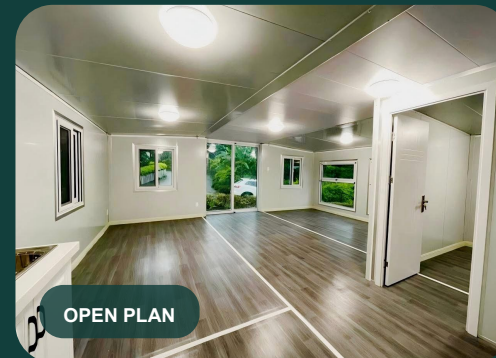

30 FT FAMILY

MULTI-ZONE

CUSTOM FINISHES

An interior that reads as a complete space.

Coordinate living, sleeping, bathroom and storage zones with a unified material palette.

DOUBLE-WING EXPANDABLE

40 ft / Built for a broader program.

The 40 ft family supports larger residential, hospitality and project layouts with multiple rooms and optional exterior features.

40 FT FAMILY

MULTI-ROOM

DECK OPTION

Room for comfort, circulation and detail.

Use the larger format to separate functions while maintaining a consistent interior language.

TWO-STOREY SERIES

Build upward when the site asks for more.

Two-storey modular arrangements expand usable area vertically for accommodation, commercial display, camp and mixed-use applications.

TWO STOREYS

EXTERNAL ACCESS

PROJECT ENGINEERING

APPLE CABIN

A compact pod with a premium edge.

A sculpted cabin format for hospitality, scenic accommodation, retail and reception uses, with distinctive glazing and facade options.

HOSPITALITY

RETAIL

PANORAMIC GLAZING

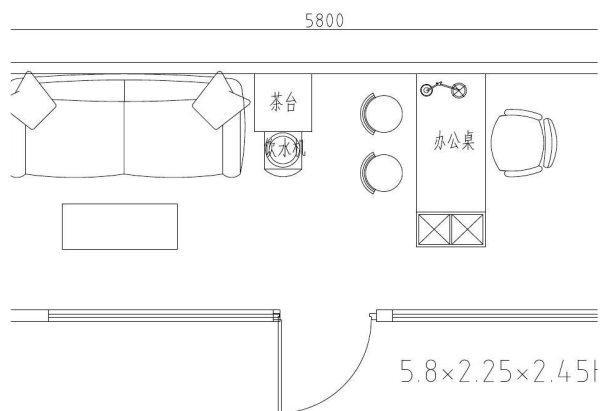

A small footprint can still feel considered.

Interior concepts combine sleeping, work and service zones within a compact, easy-to-understand layout.

Plan around the experience you want to create.

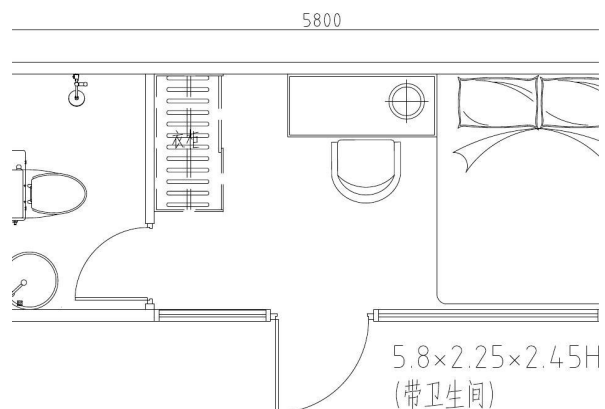

Selected compact-cabin planning examples. Final dimensions, openings and service positions are confirmed during project engineering.

01

LIVING / WORK

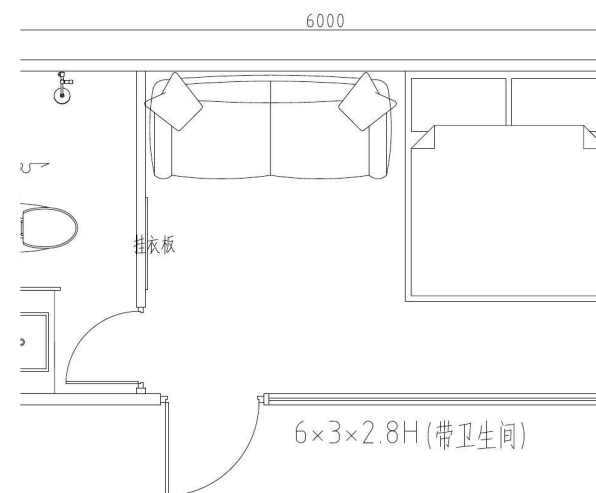

5.8 × 2.25 m concept

02

EN-SUITE ROOM

Compact private unit

03

STUDIO SUITE

6.0 × 3.0 m concept

OPTIONAL SYSTEMS

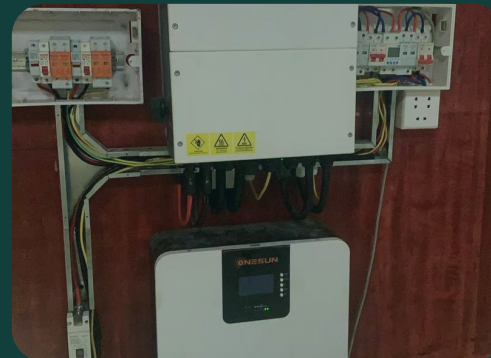

Solar-ready, where the project calls for it.

Roof-mounted photovoltaic arrays, inverter and storage options can be considered as part of a coordinated project package.

PROJECT-SPECIFIC SIZING

System design is confirmed against load, climate and local requirements.

MATERIAL PALETTE

A system you can make your own.

Coordinate exterior color, interior surfaces, flooring and service packages to match the customer experience and operating environment.

APPLICATIONS

From one room to a complete destination.

The same modular logic can support accommodation, offices, commercial spaces, camps and mixed-use project environments.

Prepared in the factory. Coordinated for the site.

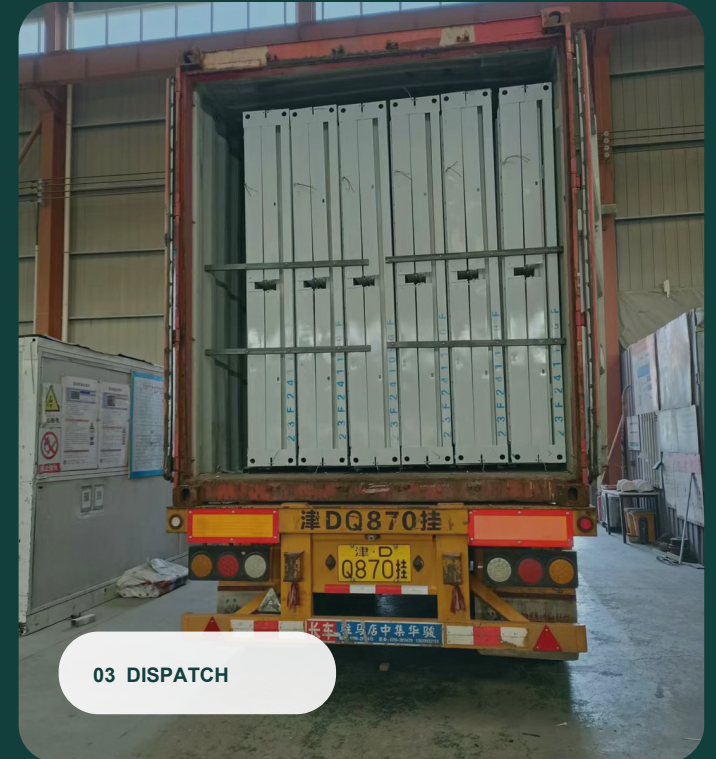

Structural components, finishes and service options are aligned before dispatch, with installation planned around the selected building system.

01 FABRICATE

02 PACK

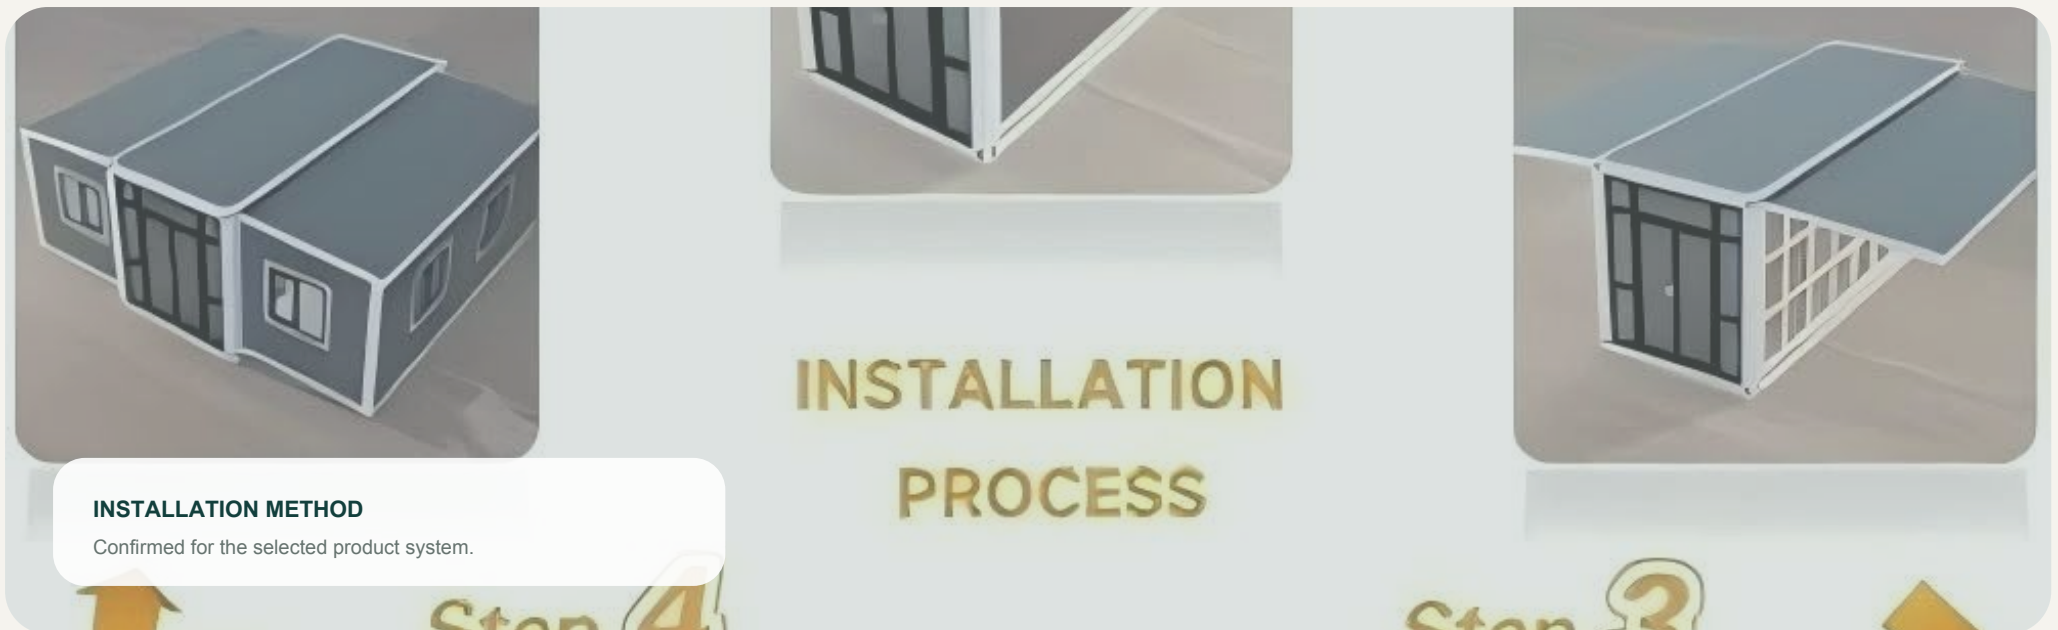

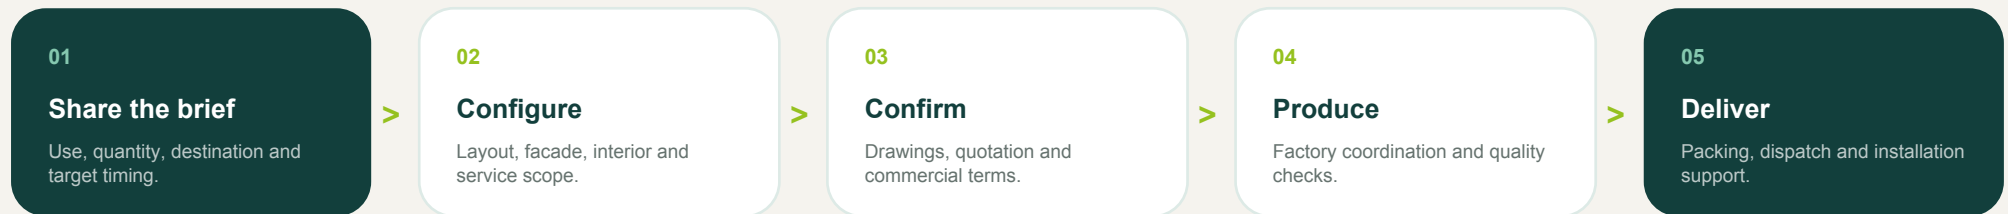

03 DISPATCH

ORDER PROCESS

A clear path from brief to handover.

Each project is confirmed through drawings, configuration, commercial terms and production planning.

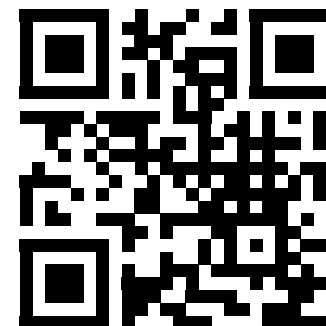

START A PROJECT

Tell us where you want to build.

Share your destination, use, quantity and preferred layout. Our team will help define the right modular starting point.
